

6.G.3 POLLUTION PREVENTION

As stated in FAA Order 1050.1E, *Environmental Impacts: Policies and Procedures*,⁴ generally, additional information or analysis is needed only if problems are anticipated with respect to meeting the applicable local, state, Tribal, or Federal laws and regulations on hazardous or solid waste management.

There would be no changes to the existing airfield configuration and airport facilities with the No Action Alternative. It is expected that Broward County would continue its current pollution prevention control through waste minimization with the implementation of any of the alternatives. The FAA would ensure that the Airport Sponsor would continue to comply with all applicable pollution control statutes as disclosed in Chapter Five, *Affected Environment*, Section 5.G.3, *Pollution Prevention*, to assure the operational compliance of their FLL facilities.

No additional information or analysis is required with respect to Broward County or the FAA meeting the applicable local, state, Tribal, or Federal laws and regulations on hazardous or solid waste management with implementation of any of the runway development alternatives.

⁴ FAA Order 1050.1E, Change 1, *Environmental Impacts: Policies and Procedures*, dated March 20, 2006.
