

Effective **Wednesday, September 29, 2021**, at 12:01 AM, the Broward County Aviation Department plans to reopen the Employee Parking Lot at 2755 SW 42nd Street to serve employees at Fort Lauderdale-Hollywood International Airport (FLL) as it did before the COVID-19 pandemic. FLL will discontinue employee parking in the Cypress garage at the same time.

Why?

- Passenger demand for onsite parking has returned as more people travel in 2021
- Faster-than-expected passenger growth in 2021 has led to the temporary use of the Employee Parking Lot for overflow guest parking, however FLL travelers prefer onsite parking
- Resuming off-site Employee Parking Lot operations will return nearly 2,750 more spaces to the Cypress Garage's inventory, which will serve to enhance the airport guest experience
- FLL temporarily relocated employee parking to the Cypress Garage in March 2020 as part of cost-saving measures to combat the devastating impacts of the pandemic as travel demand fell dramatically

Shuttle Service

- FLL's fleet of new fuel-efficient shuttles will operate on the employee lot route
- The air-conditioned buses offer comfortable seating and are ADA-accessible
- Buses will be identified as Lot 1 or Lot 2 and will only go to their designated lot
- Two employee bus stops are located on FLL's upper-level roadway, one between Terminals 1 and 2, and the other between Terminals 3 and 4
- The buses will run 24 hours a day, seven days a week, with a ten-minute headway time

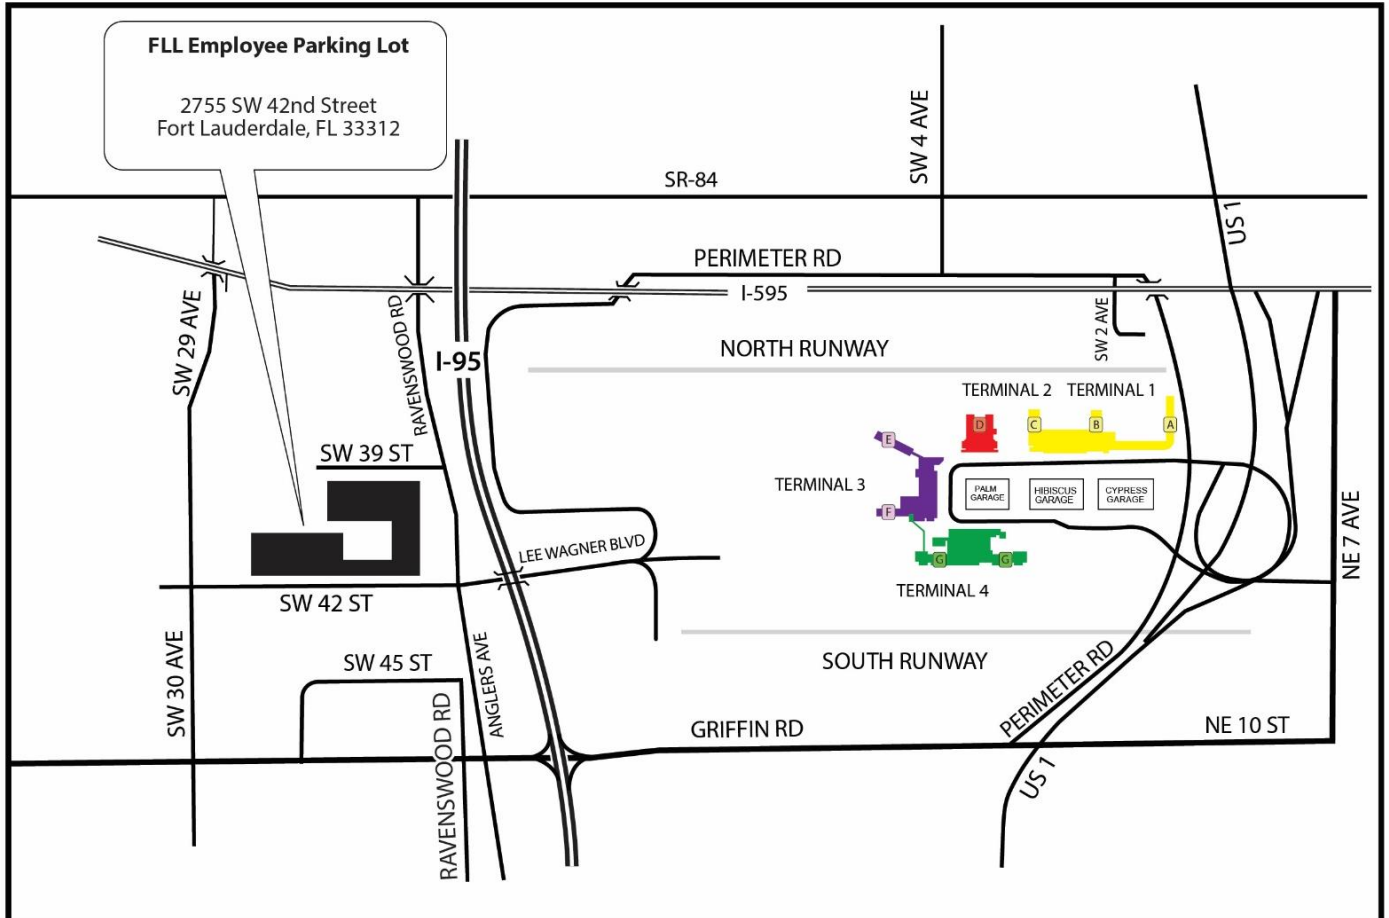

Security

- A security fence surrounds the Employee Parking Lot, and the area is well lit
- A dedicated security officer, shuttle bus supervisor, and parking staff will patrol the lot
- Each bus is equipped with interior and exterior security cameras
