WEIGHT RESTRICTION ON UPPER LEVEL “DEPARTURE” ROADWAY

The Broward County Aviation Department (BCAD) has recently completed a review/maintenance program on the departure (upper) level roadway structure that fronts Terminals 2, 3, & 4. Following this work, it has been recommended that vehicles utilizing the departure (upper) level roadway be restricted to less than 17 tons. New signage with this restriction will be installed during the week of June 8th along all main roadways leading to the departure (upper) level roadway. As a result, large charter buses, including those frequently used by cruise passenger transfer operators will need to utilize the lower level for both drop off and pick up of passengers. BCAD's ground transportation operations plan is being updated accordingly.
