Introducing Fort-Lauderdale-Hollywood International Airport’s (FLL) new shuttle bus fleet. We are introducing 48 new 40-foot shuttles with a blue exterior, comfortable fabric seats and large luggage racks. They are equipped with wheelchair ramps, an automated announcement system and has the ability to kneel meeting American with Disabilities ACT (ADA) accessibility requirements. Additionally, shuttles are equipped with technology to include an onboard camera surveillance system for increased security. The new fleet are powered by a Cummins L9 engine with heavy duty components and performance characteristics with increased fuel economy and longer maintenance intervals. The vehicles use Ultra Low Sulfur Diesel Fuel which provides lower exhaust emissions. Social distancing banners have been placed on every other seat and hand sanitizers units have been installed inside all shuttles.
