Animal Care Trust Fund Sub-Committee Reimbursement Qualification Checklist

Person/Foster/Adopter/Rescue Partner Requesting Reimbursement:

Name: Jill Sperling  Meeting Date: 7/29/2021

PLEASE CHECK-MARK ALL APPLICABLE BOXES

Emergency Reimbursement

☐ Director or Committee Authorization
☐ Veterinarian statement received
☐ Funds available

Post-Adoption or Rescue-Pull Reimbursement

☑ Adopted/Rescued from shelter
☑ Adoption within 30 days of reimbursement request
☐ Medical or surgical in nature
☑ Could not be dealt with adequately by County Veterinarian
☐ Written request received indicating why owner/rescue group cannot afford to pay expenses
☑ Treatment is not the result of apparent abuse or neglect by the owner/rescue group

Financial Need Reimbursement

☐ Sterilized or agrees to sterilize animal
☐ Has rabies vaccine and license or agrees to have vaccinated and licensed
☐ Written request received indicating why owner cannot afford to pay expenses
☐ Funds available

Extraordinary Shelter Expenses

☐ Director Authorization
☐ Services not provided by County Animal Clinic
☐ Funds available

Amount of Charges: $1,841.68  Funds available: 

Director

**Chronological History Timeline:**

**Date: 03/31/2021 to Date: 04/04/2021**

Brought Cooper home after adoption, he was coughing. He could not have a bowel movement. If anything, it was diarrhea. He strained so hard to have a bowel movement. He started vomiting as well. I boiled up chicken breast and served with broth. He would eat very little or not at all.

The Medical History Report from the clinic at the shelter provided along with the adoption papers read on 03/23/2021 “initial exam-diagnosis-healthy.” On 03/26/2021 in the comments it reads *Reported vomiting, bar. Unable to examine.” He was given Ondansetron 8 mg PO. “Monitor for continued vomiting, if persists further intervention necessary.” On 03/29/2021 it reads “Condition: NORMAL.” But he was given a 1.00 ML Antibiotic injection, a B12 injection, Metacam, PEN-G.

**Date: 04/05/2021**

Cooper had gotten no better, still vomiting, irregular bowels and form inconsistent. Brought Cooper in to see the veterinarian Jessica O’Neill at Scarbrough Animal Hospital referred by Broward County Animal Care and Adoption Division. They gave him an examination and ran bloodwork. They prescribed Metronidazole 500 mg tablets and Doxycycline tablets 100 mg for his symptoms. They gave him a shot of B12 to boost his metabolism. Administered the meds as prescribed.

**Date: 04/06/2021 to Date: 05/06/2021**

Cooper was somewhat better for a “short” while. He still struggled to move a bowel, still vomiting intermittently. Worked on his diet with him on a daily basis given his condition. You could see he did not feel well.

**Date: 05/06/2021**

Cooper’s symptoms became more serious. He was excreting a lot of blood from his anus. Brought Cooper in to see our veterinarian John Willie, DVM at VCA Promenade Animal Hospital. Cooper received an examination, bloodwork, a series of tests, IV catheter sedation. Cooper was prescribed meds. Administered to him as prescribed.
Date: 05/07/2021

Picked up additional Meds from VCA due to Cooper still not feeling well, prescribed Capromorelin (Enlyte) 30 mg/mL/15 mL Oral and 2 cans of special diet canned dog food: PD a/d K9 & Fel 5.5 oz Can and RCVD Recovery 5.8 oz/165 g /can

Date: 05/08/2021

Dr John Willie, DVM at VCA directed to pick up Trazadone HCL(gen) 100 mg Tab to relax Cooper and removed catheter from Cooper's leg.

Date: 05/09/2021 to Date: Present

Cooper is straining to make a bowel movement, vomiting sporadically. He eats however not emptying his colon. Dr. John Willie, DVM at VCA recommends to take Cooper to Advanced Veterinary Care Center in Davie, FL to have an ultrasound to check for an obstruction or partial obstruction. Cooper has not consumed any foreign objects, bones, etc.

Date: 06/12/2021

Cooper is straining to make a bowel movement, ate at 7:00 AM. I took him out and he is not having a normal bowel movement. He just excreted a few small bowels. Will continue working with him to try and get him in good health.
Date: 05/07/2021

Picked up additional Meds from VCA due to Cooper still not feeling well, prescribed Capromorelin (Enlyce) 30 mg/mL/15mL Oral and 2 cans of special diet canned dog food: PD a/d K9 & Fel 5.5oz Can and RCVD Recovery 5.8z/165g /can

Date: 05/08/2021

Dr John Willie, DVM at VCA directed to pick up Trazadone HCL(gen) 100 mg Tab to relax Cooper and removed catheter from Cooper's leg.

Jill Sperling

ANIMAL CARE AND ADOPTION DIVISION
2400 SW 42nd Street, Ft. Lauderdale, FL 33312

I have not received any donations from a 3rd party to pay for the bills I have submitted to the Animal Care and Adoption Division.

Sincerely,

Jill Sperling

Jill Sperling
### Description of Services

- **Animal Control**: $0.00
- **Estimate - Animal Control Canine**: $0.00
- **Doctor Examination (Animal Control)**: $0.00
- **Pyrantel (Strongid) Deworming - 1 Dose**: $0.00
- **Metronidazole 500 mg Tablets**: $0.00
- **Injection Cerenia**: $19.00
- **Injection B12 Vitamin (Cobalamin)**: $19.00
- **Doxycycline Tablets 100 mg**: $0.00
- **Blood/Urine Screening with Pancreas**: $0.00
- **Canine Profile with cPL**: $0.00
- **Blood Chemistry and Electrolytes**: $104.00
- **Complete Blood Count**: $47.00
- **Urinalysis with Specific Gravity**: $37.00
- **Thyroid (Total T4) Screening**: $69.00
- **Idexx Spec cPL**: $79.00
- **Fecal Dx Antigen (Idexx panel)**: $37.00
- **Heartworm Screening (Idexx)**: $27.00
- **Medicine Consult- Specialist**: $0.00
- **Package Fee Alteration**: $(110.00)
- **Ultrasound Guided Cystocentesis**: $27.00
- **Allison was your technician today**: $0.00

### Total

- **Patient Subtotal**: $355.00

---

**Reminder**

- **09/23/2021**: Bordetella Vaccination (Oral)
- **03/23/2022**: Leptospirosis Vaccination
- **03/23/2022**: Distemper/Parvo 3 year Vaccination
- **03/23/2022**: Rabies Vaccination 1 Year
- **04/05/2022**: Heartworm Screening
- **04/05/2022**: Comprehensive Healthcare Exam
- **04/05/2022**: Intestinal Parasite Detection (Float)

Date: 4/5/2021  
Patient Name: Cooper Sperling, 38781  3 Yrs. 0 Mos. Rottweiler 36.1 kilograms Neutered Male  
Dr. Jessica O'Neill  Technician: Allison

Temperature: Normal  
Pulse Rate: Normal  
Respiratory Rate: Normal

Medical History (Technician Recorded): Cooper presents for animal control. E/d - fed rice and then dog food with chicken broth. Coughing but not too often. Shaking head, not sure if from harness. Blood in stool but formed. Vomited once Saturday food, none since.

Exam (Objective):

General Appearance: Bright, alert, and responsive. Adequately hydrated.
Oral/Nasal Health: No tartar, no gingivitis. No visible oral masses or lesions.
Ears: Clean, no evidence of debris or inflammation.
Lymph Nodes: Soft, symmetrical, normal size/character.
Cardiovascular: Normal heart sounds, regular rhythm, strong synchronous pulses, well-perfused with warm distal extremities.
Pulmonary: Normal lung sound and effect.
Integument: Intact/clean coat. No evidence of ectoparasites or masses.
Urogenital: Normal.
Neurologic: Alert and appropriate, cranial nerves intact, normal gait.

  RE: DDOP LIPASE 294 U/L 0 - 250 |
Please note: the canine and feline reference intervals for lipase have been |
updated effective May 26, 2020 to reflect current IDEXX |
testing.
RE: 281 HEMOLYSIS INDEX 2+ |
Index of N, 1+, 2+ exhibits no significant effect on |
chemistry values.
RE: 282 LIPEMIA INDEX N |
Index of N, 1+, 2+ exhibits no significant effect on |
chemistry values.

SDMA and creatinine are within the reference interval: |
impairment of GFR is |
unlikely. Recommended next step: evaluate complete |
urinalysis.

4/5/2021 L 127
Endocrinology results from IDEXX Reference
Laboratory Requisition ID: 151568958  Posted  Final |
Test Result Reference Range |
T4 1.8 ug/dL 1.0 - 4.0 |
Asc: 4402805987

Dogs with no clinical signs of hypothyroidism and results |
within the reference |
interval are likely euthyroid. Occasionally, hypothyroid |
dogs can have a low |
normal T4 (1–2 ug/dL). Hypothyroidism may be further |
assessed in these dogs by |
adding a free T4 and canine TSH. For dogs on thyroid |
supplement, recommended |
therapeutic levels are 2.1–5.4 ug/dL. If this sample was |
drawn 4–6 hours |
post-pill in a dog on thyroid supplement, a low normal T4 |
suggests inadequate |
supplementation.

The American Heartworm Society recommends that a confirmatory test be run on all positive antigen test results prior to therapy, especially when a positive test result is unexpected. Confirmation of a positive test result is accomplished when combining the results of the Heartworm Antigen by ELISA with results from the Lab 4DX Plus (test code 7244), SNAP Heartworm RT, or SNAP 4Dx. Plus performed on a separate sample.

PATIENT HISTORY

Presenting concerns: Wellness exam - Got from broward animal care on 3/30. Doing well. Owner states had diarrhea went to scarborough got meds. Vomitted last Saturday and had soft stool but resolved.

Activity and exercise history: Walk activity; Indoor activity

Appetite history: Normal appetite

Defecation history: Normal defecation

Diet history: Diet specify food - Frome dry

Environment history: Always indoors

Medication history: Flea and heartworm combined preventative - HG from shelter

Respiratory history: Some cough - Owner states coughs when drinks water and sometimes when he's laying around will cough

Travel history: Has not traveled

Urinary history: Normal urination

Water consumption: Normal water consumption

EXAM FINDINGS

Whole body: General findings - BAR

Hydration: Hydration normal

Attitude: Skittish - Not Overtly Aggressive, But Possible

Eyes: General findings - Bright and clear

Ears: General findings - Clean and no Exudate

Hearing: Normal

Mouth: General findings - Tartar - Absent - Clean no Halitosis

Dental occlusion bite: Normal occlusion

All lung fields: Normal bronchovesicular sounds

Thorax: General findings - No Palpable abnormalities; Normal gait

Abdomen: Abdominal palpation - Soft Non-painful

Pelvic limbs: General findings - No Palpable Abnormalities; Range of Motion - WNL; Posture normal

Pelvic region: General findings - No Abnormalities Noted

Behavioral: General findings - Alert
15-Apr-2021 Exam
18:32
Willie DVM, John
Assisted by: Marie.Souletmessina

Cardiovascular
General findings: No murmur
Pulse quality: No Pulse Deficits

Digestive
General findings: No Vomiting or Diarrhea

Integument
General findings: No Lumps or Bumps; No pruritus; No alopecia

Lymphatic system
Peripheral lymph nodes: No Peripheral Lymphadenopathy

Musculoskeletal
General findings: Normal

Mild Pancreatitis, Fecal NPS
Rest Good
Ate and played last pm. Would not eat this AM, gave all bland foods to try
Still consider re X-ray (sedate)
If well needs catheter removed by Sat

Labs Good Mild Pancreatitis
Talked with dad
Consider entyce
If eats remove catheter today or tomorrow
