

## **DEBT SERVICE BUDGET**

Local governments traditionally issue debt to pay for capital projects for several reasons. First, the cost of these projects is normally too high to absorb into an annual budget. Second, due to inflationary increases, the cost of delaying a project until it can be financed on a pay-as-you-go basis can approach the costs of financing. Third, financing spreads the cost of the project to future populations who also benefit from the use of the facility or improvement paid for with the borrowed funds.

The revenue sources pledged to debt costs are diverse. There are two outstanding "general obligation" bond issues, which are funded through voter-approved property tax levies. The remainder of the County's bond issues use other revenue sources for repayment. Some debt service issues pledge a specific source such as water and sewer charges, or airport rents and landing fees. The County has also issued long-term debt, which pledges other "non-ad valorem revenue" sources including sales taxes, state revenue sharing, interest earnings, and other miscellaneous fees and charges. The Loan Pool and Courthouse Bonds utilize non-ad valorem revenue sources as the primary pledge. The County has utilized short-term borrowing in the past to obtain funds for capital items with short asset lives such as vehicles and equipment.

The FY16 total debt service budget is approximately \$753.6 million, which is 2.6% less than the FY15 debt service budget of \$773.6 million. The net decrease in debt service is primarily due to the \$23.9 million net decrease in the Aviation debt service budget related to the reserve for future debt. The remaining variances in debt service budgets reflect programmed changes in debt service schedules.
