## Financial Information

Budgetary control of the operating budget is maintained at the department level by fund. This means that the overall appropriations for a department cannot be increased without Board approval; however, funds may be transferred administratively within a department by fund. This explains the emphasis in the operating budget document on departmental summaries classified by fund. These summaries are found at the beginning of each departmental section.

The operating budget is organized by function (i.e., Human Services, Public Works, Transportation, etc.), which coincides with the County departmental organization structure. The departments are separated into divisions, which represent discrete activities. Divisions are separated into sections, which represent a specific program or group of inter-related programs.

The division summaries depict historical cost information and adopted budget by type of costs (i.e., personal services, operating expenses, capital expenses, etc.) and total number of positions. Revenues attributed to a particular division are also presented. The division summaries also include significant budget comments such as basic appropriation changes and new services or enhancements.

The section summaries describe a specific program or inter-related programs. These pages include a statement regarding the goal of the program, a brief description of each program, performance measures, major highlights or objectives, and specific funding and positions per section.

In summary, the operating budget reflects a comprehensive decision-making document, which is designed to communicate to the reader a very clear picture of Broward County government: its programs, policies, and goals.
