

# Hero Image Uploader

This front-end application provides an easy way for members of the Web User Group to customize the “Hero Image” (aka “banner image”) associated with their website. One Hero Image at a time can be applied to a parent site, and **it will display across all the pages within the site, including any subsites.**

## Hero Image Requirements

1. At least 1700 pixels by 500 pixels.
2. Less than 300KB.
3. JPG/JPEG format.

Images containing any of the following will be rejected/removed from the site\*:

- **No text or marketing copy.**
- **No copyrighted images (unless you own the copyright).**
- **No collages.**

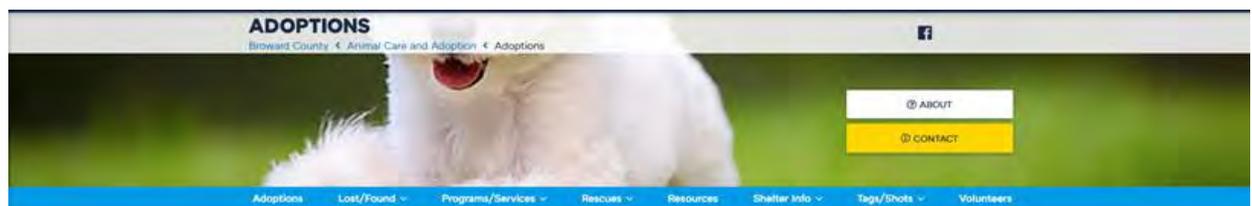

\*Hero Images are meant to add color, contrast, or a seasonal/personalized agency “feel” to your sites. They are not intended for event, program or other marketing purposes.

## SharePoint 2013 New feature: Image Renditions

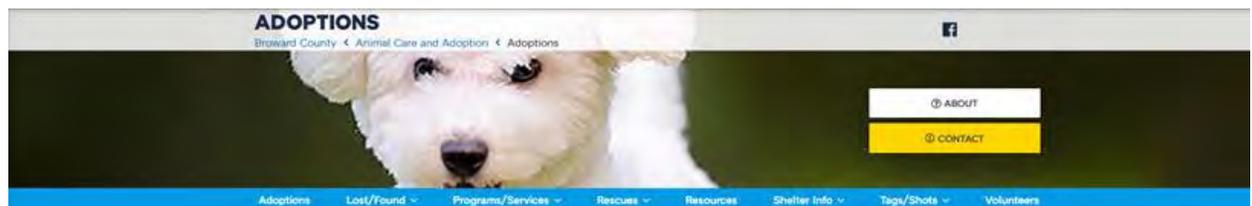

Use “image renditions” to set a specific area of the image as a focal point.

For example:

### Custom Hero Image: Without the use of Image Renditions

### Custom Hero Image: Using Image Renditions

If you do not provide a customized Hero Image, the pool of default images, which reflects various aspects of life in Broward County, will be applied.

### Example of a current Default Hero Images

### Image Approvals

It is especially important in a mobile viewing environment for images to be used properly. For quality assurance purposes, all images will be reviewed by OPC's digital government team before they are approved for posting. These are not considered critical updates, and images will be approved for public view (Broward.org) every Friday (at a minimum). The first scheduled approval Friday is August 16. Customized images can be changed out as often as you like, however each upload will initialize a new approval process.

### How the App Works

- You must be signed in to BrowardAuthor.
- Visit: <https://browardauthor/customizer/Pages/hero.aspx>
  1. From the drop down menu choose the Site where the image will be placed.
  2. Choose image to be uploaded.
  3. Upload.

For technical assistance, email the Web Team at [Webteam@Broward.org](mailto:Webteam@Broward.org).
