

Broward County Transit (BCT) is developing the Premium Mobility Plan, or PREMO. PREMO will define a vision for a world-class premium transit network in Broward County that provides modern, convenient, attractive, safe, reliable, and frequent mobility options. To achieve this vision, PREMO strategically identifies a program of projects that sequences the implementation of premium transit services – connecting local BCT routes to regional services. Examples of premium transit include bus rapid transit (BRT) or light rail transit (LRT).

What is PREMO?

PRE—mium **MO**—bility for all

PREMO Goals

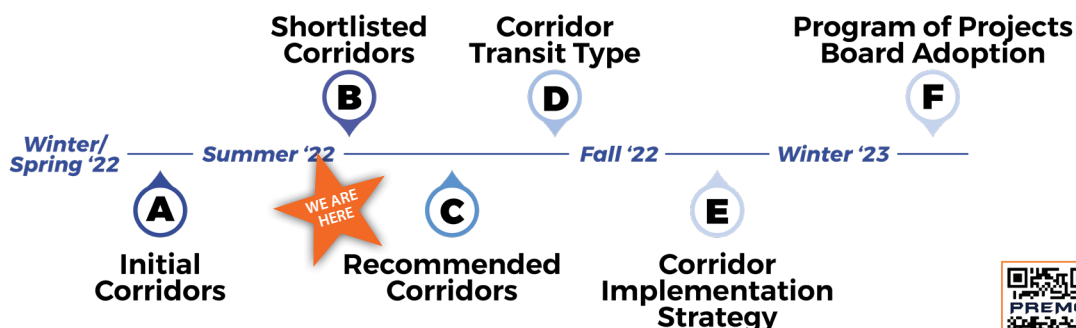

Bus Rapid Transit, or BRT, is high quality bus-based transit that uses modern vehicles and often dedicated lanes or technology to provide faster, more reliable service.

Light Rail Transit, or LRT, is passenger rail that uses modern rail cars in urban areas, often in dedicated lanes to provide frequent, reliable service.

PREMO Schedule

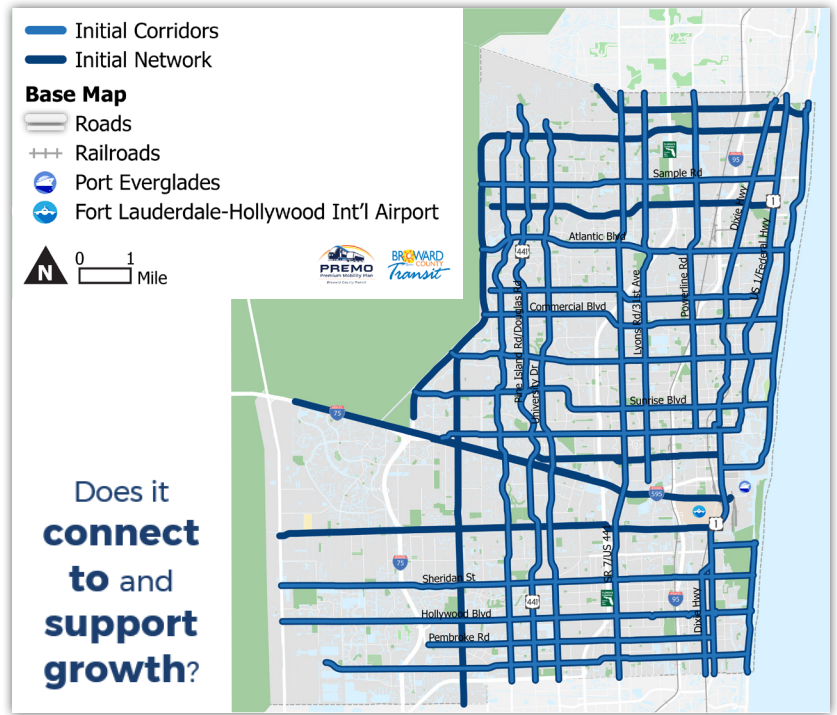

How will PREMO be developed?

PREMO began by identifying mobility needs and trends in Broward County to create the Initial Network. The Initial Network focused on major roadways where premium transit investments can be made. This is being followed by a series of steps to develop a strategy for studying and implementing the projects. Projects will be sequenced based on how well they meet the goals of PREMO, including robust and meaningful public involvement which will be a key component.

Where is PREMO now?

PREMO has identified the Initial Corridors for premium transit investments based on each corridor's ability to meet Broward County needs by connecting communities and supporting growth. Initial Corridors include:

- » **Atlantic** Boulevard
- » **Broward** Boulevard
- » **Commercial** Boulevard
- » **Cypress Creek** Road
- » **Dixie** Highway
- » **Hollywood/Pines** Boulevard
- » **Lyons** Road/**31st** Avenue
