

Grant applications should be in narrative format and address each of the attached criteria. Please limit your narrative text to 3 pages. You may attach supporting figures and maps in addition to narrative text. It is recognized that most projects proposed will be conceptual and detailed specifications and calculations are not expected in your grant application. Projects will be considered for funding by the Broward County Water Advisory Board Technical Advisory Committee on August 18, 2023, pending final scheduling.

2023 Criteria for IWRP Grants for Water Resource Feasibility and Design Projects

Please address narratively each of the following criteria in your IWRP grant application

- A. Project name
- B. Brief description of water resource management or alternative water supply project
- C. Project sponsors willing and able to support a minimum 50% cost share on feasibility/preliminary design analysis (10 points)
- D. Encourages regionalization of local water supplies (15 points)
- E. Reduces competition for water supplies through more effective water management operations (10 points)
- F. Furthers Lower East Coast Water Supply Plan or Broward County-wide Integrated Water Resource Plan (20 points)
- G. Supports the investigation of a dependable, sustainable water supply that is not otherwise feasible (5 points)
- H. Enhances isolated wetlands, helps protect the Everglades and other environmentally sensitive areas, improves water quality, facilitates aquifer protection or reduces saltwater intrusion (15 points)
- I. Significantly implements reuse, storage, recharge, or conservation of water (15 points)
- J. Provides an innovative approach or technology (5 points)
- K. Meets additional criteria not listed which make this project valuable (5 points)

Deadline for Submission of Fully Completed Grant Applications is August 11, 2023
